

## Professional desktop mono printing for small workgroups

In our experience, simplicity equals reliability. And that's what you can expect from the B440dn printer - a robust, simple design with ultra-reliable digital LED technology for monochrome printing with absolute confidence.

Combine that with intelligent design and a range of handy utilities you'll see why OKI printers just keep on printing, page after page and day after day. They're just what you need for a busy office.

### Everything you need

As you would expect from OKI, the B440dn gives you everything you need from a small workgroup desktop printer. With its high duty cycle, true 1200 x 1200dpi resolution, a paper capacity that's expandable to 1,110 sheets, including a 50 sheet multi-purpose feeder, and the potential for using toner cartridges up to 10,000 pages, this is the printer of choice for busy offices. What's more automatic two-sided printing is standard, saving paper and reducing costs.

### Easy to live with

The B440dn has that famous OKI ease of use. A front-facing LCD display gives clear, at-a-glance status information, the toner cartridge can be replaced in moments (it's the same with the paper), and there's a whole suite of powerful productivity software to make life in the office easier than ever. And that's OKI. Reliable, high quality printers that everyone in the office can depend upon.

### Dependable performance

You'll find that the first page appears in just 5.5 seconds and the rest follow at an impressive 28 pages per minute (ppm) - speeds you can be confident of, thanks to a powerful processor and a generous standard 64MB memory that's expandable right the way up to 320MB.

### Powerful productivity software

The B440dn is complimented with useful utilities to help you get even more value from this reliable desktop printer:

- Print Control - for tracking usage and controlling access for tighter cost control.
- PrintSuperVision - browser-based monitoring and management of all your network printers, regardless of make or model.
- Template Manager 3.0 - editable, easy to use templates for creating a wide range of office documents.
