# SafeGuard i-Frame™

The ideal technology mount for the iPad 2, 3, 4 and Air generations

The i-Frame combines those all-important aesthetic looks with a practicality that makes it ideal for desk, wall and floor mounted applications throughout retail and hospitality environments. Additionally, the i-Frame is highly suitable for mobile use, offering both protection of hardware and improved handling through lightweight materials and exclusive finishes.

The omni-channel retail experience has to focus on maximising the customer experience, and i-Frame, with its black, white or aluminium fascia, ensures a secure mount for both mobile and static customer facing applications.

Security and flexibility is key, and i-Frame offers a range of features protecting the iPad from misuse, damage and theft. The enclosure's design limits access to cables, connections, power and volume buttons, and the casing allows the attachment of our ClickSafe® range of security tethers.

The i-Frame brings a new level of design and functionality to iPad mounts and enclosures. With applications being driven by the need for greater customer service and the provision of instant information from the web or apps, i-Frame ensures the basic principles that drove the development of the iPad are kept whilst enabling what is essentially a consumer device, to deliver business solutions throughout the store. The i-Frame is offered with a wide range of mounting options and accessories to support versatile and contemporary use cases.

## Features

- Flexible - fits iPad generation 2, 3, 4 & air (with sleeve)
- Suitable for mobile use as well as fixed installations
- Lightweight, yet durable sandwich construction
- Exclusive materials and finishes
- Secure and protective
- Internal and external cable management
- Supports lightning and 30-pin connector
- Easy installation

### Ergonomic Solutions

Founded in 1996, Ergonomic Solutions has grown rapidly to become a global leader in the design, manufacture and supply of the most ergonomically advanced mounting and security solutions for a wide range of in-store, and mobile technology for markets including retail, banking, mass transit, and hospitality. Ergonomic Solutions has long been at the forefront of workspace planning and optimisation and our influential Ergonomics Consultancy has advised many of the major European retailers how to create a workspace that optimises accessibility, usability, safety and comfort for their staff and customers.

Our suite of technology mounting solutions is designed to provide an ergonomic solution across a huge range of applications. From the shop floor to the management suite, we can deliver a solution that ensures that your IT investment makes the best use of the available workspace whilst simultaneously being protected from damage and theft.

*Ergonomic Solutions owns all distribution and intellectual property rights to the Ergonomic Solutions corporate brand, as well as its brands SpacePole®, SpacePole Light®, SpacePole Essentials®, SpacePole SafeGuard™, SpacePole ClickSafe®, SpaceServ®, DuraTilt® and MultiGrip™.*
