Help function

The blue circle on the keyboard marked as "HELP" can print guidance messages on the receipt printer which contain answers to frequently asked questions such as how to program the time and date. Furthermore, these messages are customizable to meet individual needs.

```

ENTER NUMBER THEN
PRESS <HELP> KEY.

01:HOW TO PROGRAM
DATE AND TIME?

02:UNIT PRICE FOR
DEPARTMENTS AND PLUS

03:HOW TO PROGRAM
TAX TABLE?

04:HOW TO REPLACE
    
```

Data storage for your sales reports and program data backup

A CF (Compact Flash) card can be used as a storage device for sales data to create your reports with spreadsheet software to make creating sales reports much easier. A CF card can store program data for backup purposes as well.

Peripherals

Two serial ports are available for direct connection to a PC, external remote printer, modem for connecting to head office, scanner for barcode reading, or slip printer for printing guest receipts or validation.

Barcode reading function

The function for direct entry of items not found eliminates the time necessary for searching for new items, thus reducing queues at the register. Items can be added to the master file directly using the associated department name. Direct and batch maintenance functions in the program mode are also available for further processing. The master file can handle newly introduced items according to your program and can be optimized using the inactive items report.

Table control function

Basic table control function is provided for small restaurants, cafés and bars. External printer can be configured for order or receipt printing.

OTHER USEFUL FUNCTIONS

- Clerk interrupt function
- Scheduler function
- Set menu function
- Backlight turns off automatically when timer is programmed
- Arrangement function
- Memory allocation function
